

Steps to set game clock and run scoreboard at McCall

Here's how:

1. Plug the control cord into the back of the console into the plug marked SCOREBOARD. (There are 2 outputs. The one below the "A" of SCOREBOARD works.) Make sure toggle switch on right side of console is in OFF position (i.e., bottom of switch is depressed).
2. Plug in the power cord. Plug the control cord into the input in the power strip behind the scorer's table.
3. Hit the RED button marked PROGRAM until the display indicates, NEW GAME with an arrow pointing down in the line below.
4. Hit the SET CLOCK button, then 1 and 6, then ENTER. (The game clock should display 16:00)
5. Hit the QTR button, then 1, then ENTER. (The game clock should display PERIOD 1. It will advance automatically to Period 2.)
6. Clock starts and stops with toggle switch on right side of console. Button for SUBS is there, too.
7. For scoring:

If home team scores, check screen to see that screen above the time toggle switch reads HOME SCORE. If so, hit +2 for field goal (or +1 for free throw). HIT -1 as many times as necessary for errors.

Otherwise, to change from HOME SCORE or VISITOR SCORE, hit BLUE/YELLOW BUTTONS so that screen displays accordingly.
8. To run half time, hit SET TIME, then 5, then ENTER. Toggle time switch ON. (RESET PERIOD to 2, if necessary, after halftime. See, step 5, above.)
